Buffer is full and inverter polling period has occured

Buffer pointer repositioned

buffer full

pointer repositioning

Processor is idle and inverterpolling period occurs

buffer not full

Spacious buffer with polling data

inverter polling interval reached

polling

Buffering

Buffering Completed

15 min interval flag

Processor Idle

Update sent and ACK received

Processor is idle and update period occurs

Sending Update to the Server

ACK Received

Buffer is full and inverter polling period has occured

Buffer pointer repositioned

buffer full

pointer repositioning

Processor is idle and inverterpolling period occurs

buffer not full

Spacious buffer with polling data

inverter polling interval reached

polling

Buffering

Buffering Completed

15 min interval flag

Processor Idle

Update sent and ACK received

Processor is idle and update period occurs

Sending Update to the Server

ACK Received

Buffer is full and inverter polling period has occured

Buffer pointer repositioned

buffer full

pointer repositioning

Processor is idle and inverterpolling period occurs

buffer not full

Spacious buffer with polling data

inverter polling interval reached

polling

Buffering

Buffering Completed

15 min interval flag

Processor Idle

Update sent and ACK received

Processor is idle and update period occurs

Sending Update to the Server

ACK Received

Buffer is full and inverter polling period has occured

Buffer pointer repositioned

buffer full

pointer repositioning

Processor is idle and inverterpolling period occurs

buffer not full

Spacious buffer with polling data

inverter polling interval reached

polling

Buffering

Buffering Completed

15 min interval flag

Processor Idle

Update sent and ACK received

Processor is idle and update period occurs

Sending Update to the Server

ACK Received

Buffer is full and inverter polling period has occured

Buffer pointer repositioned

buffer full

pointer repositioning

Processor is idle and inverterpolling period occurs

buffer not full

Spacious buffer with polling data

inverter polling interval reached

polling

Buffering

Buffering Completed

15 min interval flag

Processor Idle

Update sent and ACK received

Processor is idle and update period occurs

Sending Update to the Server

ACK Received

Buffer is full and inverter polling period has occured

Buffer pointer repositioned

buffer full

pointer repositioning

Processor is idle and inverterpolling period occurs

buffer not full

Spacious buffer with polling data

inverter polling interval reached

polling

Buffering

Buffering Completed

15 min interval flag

Processor Idle

Processor is idle and update period occurs

Update sent and ACK received

Sending Update to the Server

ACK Received

Buffer is full and inverter polling period has occured

Buffer pointer repositioned

buffer full

pointer repositioning

buffer not full

Processor is idle and inverterpolling period occurs
